

TSX: ALS | OTCQX: ATUSF

Altius directly and indirectly holds diversified royalties and streams which generate revenue from 15 operating mines. These producing royalties are located in Canada and Brazil and provide exposure to copper, zinc, nickel, cobalt, iron ore, potash, thermal (electrical) and metallurgical coal. The portfolio also includes development stage royalties in copper and renewable energy and numerous predevelopment stage royalties covering a wide spectrum of mineral commodities and jurisdictions. Altius also holds a large portfolio of exploration stage projects which it has generated for deal making with industry partners that results in newly created royalties and equity and minority interests. Altius is a member of both the S&P/TSX Small Cap and S&P/TSX Global Mining Indices.

15 Producing and Diversified Royalties

Investment Grade Operators

Macro-Trend	Altius Royalty Exposure	
Fossil Fuel to Clean Energy Conversion	Coal to Renewables	Reinvesting declining coal royalty proceeds to fund the advancement of a portfolio of more than 23 GW of potential new renewable projects
Electrification and Storage	Cu, Co, Ni, Li	Copper represents a large portfolio component. Royalty exposure to battery metals - Nickel, Cobalt and Lithium - set to increase in importance
Soil Quality/Agricultural Yield Improvements	Natural Potash Fertilizer	Altius's potash exposure to top-tier Canadian mines that are ramping up capacity as the need for sustainable food production increases
Lower Emission Steel Making	Clean Iron Ore Products	High iron / low impurity concentrates and pellets that require less metallurgical coal usage in steel making – minimizing emissions
