
**ALTIUS REPORTS Q1 F2018 REVENUE OF \$15.4M;
DECLARES QUARTERLY DIVIDEND**

St. John's - Altius Minerals Corporation ("Altius" or the "Corporation") reports Q1 attributable revenue⁽¹⁾ of \$15,363,000 compared to \$13,453,000 in the last quarter (Q4 F2017) and \$8,410,000 in the year-ago quarter (Q1 F2017). Adjusted EBITDA⁽²⁾ of \$12,624,000 in the quarter is up 23% from Q4 2017 levels of \$10,260,000 and almost double its year-ago comparable level of \$6,403,000. Net earnings for the quarter were \$4,492,000, or \$0.10 per share, compared to a loss of \$0.02 per share in Q4 F2017 and net earnings of \$3,038,000, or \$0.07 per share, in the prior year's quarter.

Higher volumes and realized prices across most of our portfolio drove the increased royalty revenue and are discussed in more detail in the Management's Discussion and Analysis of Financial Conditions and Results of Operations (MD&A). In the current quarter, the higher adjusted EBITDA and net earnings reflect both the revenue growth and lower costs and expenses as our prior acquisitions become integrated.

Brian Dalton, President and CEO, commented, "Our aggressive acquisition strategy during the 2014 -2016 down cycle for base metals and bulk commodities is now being well rewarded as the inevitable cyclical recovery begins to take hold. While we are currently tracking ahead of our guidance of \$55 million in attributable revenue for the full year we note that prices are displaying a high degree of volatility over short time frames. As such we are choosing to maintain our estimate for the time-being and will review again when providing our mid-year results."

The following table summarizes the financial results.

Additional information on the Corporation's results of operations is included in the Corporation's MD&A, and Financial Statements, which were filed on SEDAR today and are also available on the Corporation's website at www.altiusminerals.com.

The cumulative market value of the publicly traded junior exploration company shares held within our project generation division equity portfolio remained stable through the first quarter. The portfolio value as of July 31, 2017 was \$34.5 million compared to \$33.4 million at the end of the previous year.

Altius was active in generative exploration, including research and data assessment, field investigations, project advancement, and land acquisition during the period, enhancing its diversified exploration portfolio of largely base and precious metals projects. Our mineral rights now total more than 1.7 million hectares in Canada, the United States, Finland, the Republic of Ireland, Australia, and Chile, which the Corporation considers highly prospective and marketable.

While continuing to generate innovative new projects, the Corporation is also committed to attracting quality partners to its current projects via sales and earn-in/joint venture agreements, or through spinout opportunities, while in most cases retaining royalty interests. Altius anticipates executing multiple new agreements in the coming quarter and in particular is working diligently towards the spin-out of a new copper focused company that will, amongst other assets, hold our mineral land interests in Chile. More information on Altius projects can be found at www.altiusminerals.com.

The Corporation also confirms that its board of directors has declared a cash dividend on its common shares of three cents per common share to all shareholders of record at the close of business on October 6, 2017. The dividend is expected to be paid on or about October 20, 2017. The declaration, timing and payment of future dividends will largely depend on the Corporation's financial results as well as other factors. Dividends paid by Altius are eligible dividends for Canadian income tax purposes unless otherwise stated.
