

FORWARD LOOKING STATEMENTS

This document includes certain statements that constitute “forward-looking statements” and “forward-looking information” within the meaning of applicable securities laws (collectively, “forward-looking statements”). Forward-looking statements include statements regarding Altius Minerals Corporation’s (“Altius”) intent, or the beliefs or current expectations of Altius’ officers and directors. Such forward-looking statements are typically identified by words such as “believe”, “anticipate”, “estimate”, “project”, “intend”, “expect”, “may”, “will”, “plan”, “should”, “would”, “contemplate”, “possible”, “attempts”, “seeks” and similar expressions. Forward-looking statements may relate to future outlook and anticipated events or results.

By their very nature, forward-looking statements involve numerous assumptions, inherent risks and uncertainties, both general and specific, and the risk that predictions and other forward-looking statements will not prove to be accurate. Do not unduly rely on forward-looking statements, as a number of important factors, many of which are beyond Altius’ control, could cause actual results to differ materially from the estimates and intentions expressed in such forward-looking statements.

Forward-looking statements speak only as of the date those statements are made. Except as required by applicable law, Altius does not assume any obligation to update, or to publicly announce the results of any change to, any forward-looking statement contained herein to reflect actual results, future events or developments, changes in assumptions or changes in other factors affecting the forward-looking statements.

ONE CONTRARIAN STRATEGY, TWO COMPLEMENTARY BUSINESSES

Royalty Business

COMMODITY DIVERSIFICATION

LONG LIFE ASSETS = EXPANSION OPTIONALITY

† Mine lives calculated based on current mineral inventory and 2017 throughput. Thermal coal asset lives denote the 2017 weighted average revenue and expected plant closure and not based on reserves.

PRODUCING ROYALTY UPDATES

CARDINAL RIVER

Q2 reporting by Teck included a highlighted announcement that a detailed design study is underway to develop a new mining area within the Cardinal River project area. This was noted to offer the potential to extend the mine life by 9 years to 2029 at a production rate of approximately 1.4MT per year in addition to existing production.

IOC

Operations have fully resumed following the resolution of a 9 week labour disruption during Q2. The new Wabush 3 pit development is expected to come online in the second half of 2018 and support efforts to increase annual finished product output levels. The industry leading quality premiums attracted by the high iron content, ultra-low alumina content of the pellets and concentrates produced by IOC continued to widen during the period.

CHAPADA

Yamana has announced a 3-phase expansion program at Chapada. The first phase involves current capital investments to improve metal recoveries. A stage 2 expansion of the processing plant from 23 to 32 Mtpa and a stage 3 pit wall pushback are both under feasibility study. Exploration beyond the immediate mine area continues to identify significant mineralization that could result in the further expansion or extension of current operations or lead to additional mining and processing centers within the extensive project area.

VOISEY'S BAY

15 year mine life extension announced in June 2018 following completion of a cobalt based stream financing. Altius and its partner Royal Gold advanced a lawsuit against Vale to the point of a court trial in September 2018, at which time a settlement was reached and announced. The settlement allows for resumption of a Voisey's Bay royalty on copper, cobalt and nickel production from the existing ovoid open pit production and the new underground production to be processed at Long Harbour.

PRODUCING ROYALTY UPDATES

777

Hudbay provided guidance during the quarter that it has pushed back its planned closure date at 777 by a year to late 2021 while also noting that it continues to evaluate options that could lead to further mine life extensions.

POTASH PORTFOLIO

Nutrien increased its guidance for global potash demand and its overall production levels for potash. It also noted an increase in year over year potash pricing (Altius estimates 15-25% depending on region), as a result of tight global supply. A modest production curtailment at Vanscoy was announced with concurrent increases in production rates at other lower cost operations. The curtailed capacity was noted as being available for future resumption as continuing market demand growth requires.

Global Potash Consumption

RESOURCE STAGE ROYALTY UPDATES

GUNNISON PROJECT

Operator	Excelsior Mining Corp.	1.0% GRR, further option on additional 0.5%	<p>The Environmental Protection Agency (EPA) issued Excelsior the UIC Permit with an effective date of August 1, 2018. An appeal was filed with the Environmental Appeals Board (EAB). Excelsior, the EPA, and the Petitioners have submitted to the EAB a joint stipulated motion to dismiss the Appeal. It is anticipated that the EAB will accept the joint motion to dismiss the Appeal which, subject to notice by the EAB, will prompt the EPA to lift the stay, thereby resulting in the UIC Permit becoming effective with permanence.</p>	
Commodity	Copper			
Location	Arizona, USA			

KAMI PROJECT

Operator	Alderon Iron Ore Corp.	3.0% GSR	<p>Alderon provided an updated Feasibility Study (FS) on the Kami Project. On a post-tax basis, the updated FS shows an NPV of \$866 million at a cash flow discount rate of 8%. The post-tax IRR for the project is 18.2% and the payback period is 4.9 years.</p>	
Commodity	Iron			
Location	Newfoundland/Labrador, Canada			

TELKWA PROJECT

Operator	Allegiance Coal Ltd.	1.5 – 3% price sliding scale GSR	<p>Allegiance announced target production rate of 750,000 saleable tonnes of metallurgical coal over a mine life of 22 years during Phase I. A private placement was also announced in September 2018 raising A\$2.4 million with proceeds largely directed toward completion of a definitive feasibility study and permitting.</p>	
Commodity	Metallurgical Coal

PROJECT GENERATOR BUSINESS GROWTH

Value Creation Through Project Generator Junior Portfolio

- 54 Projects converted to junior equity and new royalties since 2016 market bottom
- Does not include \$10M equity convertible debenture in Champion Iron, or indirect holdings and in-the-money share purchase warrants

PROJECT GENERATION HIGHLIGHTS

- Copper-gold rich VMS deposit in west-central Ecuador within the Curipamba project that possesses significant exploration upside
- Adventus is earning 75% in project through spending US\$25M over 5 years
- Recent infill drilling results include: 19.41 metres of 7.0% Cu, 1.61 g/t Au, 3.0% Zn, 18.4 g/t Ag, and 0.1% Pb (June 6, 2018)

- Recent drilling results from Moosehead Project in Central Newfoundland has confirmed a high grade discovery
- Drilling from the first three holes include: 11.90 meters of 44.96 g/t Au, 6.85 meters of 0.50 g/t Au and 6.42 meters of 8.18 g/t Au.
- The second phase of drilling is expected to begin in early fall of this year

- Cuale exploration program where Altius holds a royalty, yielded a discovery with trench sampling returning 1.67 g/t Au over 263.2 meters and 13.61 g/t Au over 106.2 m in a second trench
- Newmont became a strategic investor in August 2018
- First Majestic also completed a 100% earn-in on Ermitaño West deposit where 13,000 meters drill program is progressing
