
**ALTIUS REPORTS THIRD QUARTER FINANCIAL RESULTS;
 DECLARES QUARTERLY DIVIDEND**

St. John's - Altius Minerals Corporation ("Altius" or the "Corporation") reports attributable revenue⁽¹⁾ for the three months ended January 31, 2017 of \$14,535,000 or \$0.34 per share and adjusted EBITDA⁽²⁾ of \$11,262,000 or \$0.26 per share compared to attributable revenue of \$7,301,000 or \$0.18 per share and adjusted EBITDA of \$6,273,000 or \$0.16 per share for the prior year comparable period. This represents a new quarterly attributable revenue record and is a 46% increase over the second quarter ended October 31, 2016 and 99% over last year's comparable quarter ended January 31, 2016.

Year to date, the Corporation has recorded attributable revenue of \$32,911,000 (2016 - \$25,620,000) and adjusted EBITDA of \$24,451,000 (2016 - \$18,843,000).

The net loss for the quarter was \$67,293,000, or \$1.55 per share, compared to a net loss of \$16,794,000, or \$0.42 per share, for the comparable prior year quarter. The year to date net loss is \$64,046,000 (2016 - \$18,479,000).

The increased quarterly and year to date revenue is as a result of higher realized prices for copper, zinc and metallurgical coal, the first full quarter of revenue from the Chapada copper stream, improved potash royalty production volumes and mine sequencing based volume increases from its thermal coal royalties. These revenue increases were partially offset by lower realized potash prices and a nil payment related to the Voisey's Bay royalty.

The higher quarterly and annual net losses result largely from the previously reported recognition of a non-cash impairment charge of \$72,001,000 for the Corporation's Genesee royalty interest during the quarter. This decision was made in response to policy changes in the province of Alberta that are intended to phase out coal fired electrical generation by 2030.

A summary of the financial results is included in the following table.

Non-IFRS Measures

Attributable revenue and adjusted EBITDA is intended to provide additional information only and do not have any standardized meaning prescribed under IFRS and should not be considered in isolation or as a substitute for measures of performance prepared in accordance with IFRS. Other companies may calculate these measures differently. For a reconciliation of these measures to various IFRS measures, please see below.

- (1) Attributable revenue is defined by the Corporation as total revenue from the consolidated financial statements and the Corporation's proportionate share of gross revenue in the joint ventures. The Corporation's key decision makers use attributable royalty revenue and related attributable royalty expenses as a basis to evaluate the business performance. The attributable royalty revenue amounts, together with as amortization of royalty interests, general and administrative costs and mining tax, are not reported gross in the consolidated statement of earnings (loss) since the royalty revenues are being generated in a joint venture and IFRS 11 Joint Arrangements requires net reporting as an equity pick up. The reconciliation to IFRS reports the elimination of the attributable revenues and reconciles to the revenues recognized in the consolidated statements of earnings (loss).
- (2) Adjusted EBITDA is defined by the Corporation as net earnings (loss) before taxes, amortization, interest, non-recurring items, non-cash amounts such as impairments, losses and gains, and share based compensation. The Corporation also adjusts earnings in joint ventures to reflect EBITDA on those assets which exclude amortization of royalty interests as well as adjusting for any one time items. Adjusted EBITDA is a useful measure of the performance of our business, especially for demonstrating the impact that EBITDA in joint ventures have on the overall business. Adjusted EBITDA identifies the cash generated in a given period that will be available to fund the Corporation's future operations, growth opportunities, shareholder dividends and to service debt obligations.

About Altius

Altius directly and indirectly holds diversified royalties and streams that generate revenue from 15 operating mines. These are located in Canada and Brazil and produce copper, zinc, nickel, cobalt, iron ore, potash and thermal (electrical) and metallurgical coal. The portfolio also includes numerous pre-development stage royalties covering a wide spectrum of mineral commodities and jurisdictions. In addition, Altius holds a large portfolio of exploration stage projects which it has generated for deal making with industry partners that results in newly created royalties and equity and minority interests.

Altius has 43,335,654 shares issued and outstanding that are listed on Canada's Toronto Stock Exchange. It is a member of both the S&P/TSX Small Cap and S&P/TSX Global Mining Indices.
