1. NATURE OF OPERATIONS AND CORPORATE INFORMATION

Altius Minerals Corporation (“Altius” or the “Corporation”) is a diversified mining royalty, streaming and mineral project generation company with royalty and streaming interests in 14 operating mines located throughout Canada and Brazil. The royalty and stream interests cover mining operations producing copper, zinc, nickel, cobalt, precious metals, potash and thermal (electrical) and metallurgical coal. The Corporation holds other pre-development stage royalty interests, and several other earlier stage royalties that were created through project generation. It also holds equity interests in non-precious metals royalty companies, as well as various junior mineral exploration companies that undertake a project generation and joint venture type business model.

Altius is a publicly traded company, incorporated and domiciled in Canada. The address of its registered office is Suite 202, 66 Kenmount Road, St. John’s, Newfoundland and Labrador, Canada A1B 3V7.

These unaudited condensed consolidated financial statements were approved and authorized for issuance by the Board of Directors on September 13, 2016.

2. BASIS OF PRESENTATION

These unaudited condensed consolidated financial statements have been prepared in accordance with *International Accounting Standards ("IAS") 34, Interim Financial Reporting* using the same accounting policies and methods of computation as the Corporation’s most recent annual consolidated financial statements, except as described in Note 3. The unaudited condensed consolidated financial statements should be read in conjunction with the annual consolidated financial statements for the year ended April 30, 2016, which have been prepared in accordance with International Financial Reporting Standards (“IFRS”) as issued by the International Accounting Standards Board (“IASB”).

These unaudited condensed consolidated financial statements have been prepared on an historical cost basis, except for derivative assets and liabilities, and financial assets classified at fair value through profit or loss or available-for-sale investments which are measured at fair value. Additionally, these unaudited condensed consolidated financial statements have been prepared using the accrual basis of accounting, except for cash flow information. All amounts are expressed in Canadian dollars, unless otherwise stated.

3. ACCOUNTING POLICIES AND NEW AND FUTURE ACCOUNTING PRONOUNCEMENTS

The accounting policies applied in the Corporation’s unaudited condensed consolidated financial statements are consistent with those of the annual consolidated financial statements as at and for the year ended April 30, 2016, other than as described below.

Segment reporting

During the quarter ended July 31, 2016, the Corporation closed a number of significant transactions which have resulted in management reassessing the internal financial reporting structure. Effective May 3, 2016, the Corporation completed its acquisition of Chapada (Note 8) and closed an equity and debt financing. In addition, the Corporation began a legal and tax reorganization to eliminate historical acquisition related structures and align the internal businesses with operational goals. As a result, the Corporation is managing its business under two operating segments consisting of:

3. ACCOUNTING POLICIES AND NEW AND FUTURE ACCOUNTING PRONOUNCEMENTS (CONTINUED)

- the acquisition and management of producing and development stage mining royalty and streaming interests ("Royalties"), and;
- the acquisition and early stage exploration of mineral resource properties with a goal of vending the properties to third parties in exchange for early stage royalties and minority equity or project interests ("Project Generation").

Both business segments are evaluated with the goal of being financially self sustaining and profitable over the full commodity cycle. All assets are allocated between the segments and all revenues and expenses are allocated to each segment based on the specific nature of the revenue or expense. The reportable segments are consistent with the internal reporting structure of the Corporation which is provided to the Chief Executive Officer ("CEO") and the Chief Financial Officer ("CFO") who fulfill the role of the chief operating decision-maker ("CODM"). The CEO and CFO are responsible for assessing performance of the Corporation's operating segments and for making resource allocation decisions. Intersegment transactions are not significant and are eliminated on consolidation.

The comparative historical segment information has been restated (see Note 17) to reflect the Corporation's current reportable segments.

Intangible assets – streaming interest and streaming revenue

Streaming interests are initially recorded at their estimated fair value based on consideration paid to acquire the asset. These intangible assets have finite lives and are amortized and depleted over their useful economic lives on a units of production basis. The amortization and depletion expense is included in the statement of earnings. All intangible assets are reviewed for impairment indicators at each reporting period.

Streaming revenue is recognized when the underlying commodity is extracted, the amount of revenue can be measured reliably, it is probable that the economic benefits associated with the transaction will flow to the Corporation and the costs incurred or to be incurred in respect of the transaction can be measured reliably.

New and future accounting pronouncements

Adoption of amendments to accounting standards issued by the IASB which were applicable from January 1, 2016, as disclosed in the annual consolidated financial statements of the Corporation for the year ended April 30, 2016, did not have a material impact on the accounting policies, methods of computation, or presentation applied by the Corporation in these condensed consolidated financial statements.

The Corporation has not early adopted any standard, interpretation or amendment that has been issued but is not yet effective as disclosed in the annual consolidated financial statements as at April 30, 2016.

4. CRITICAL ACCOUNTING ESTIMATES

In preparing these unaudited condensed consolidated financial statements, the significant judgments made by management in applying the Corporation's accounting policies, basis of consolidation and the key sources of estimation uncertainty were the same as those that applied to the audited consolidated financial statements for the year ended April 30, 2016, except as described below.

(Tabular amounts in thousands of Canadian dollars, except per share amounts)

4. CRITICAL ACCOUNTING ESTIMATES (CONTINUED)

Streaming interest: The Corporation holds streaming interests in production stage mineral properties. The streaming interests are recorded at the fair value assigned to the assets and are being amortized and depleted using the units of production basis over the expected life of the related mineral property, which is determined using available estimates of proven and probable reserves. Determination of proven and probable reserves by the operators associated with the streaming interest impact the measurement of the streaming interest. These estimates affect amortization and depletion and the assessment of the recoverability of the carrying value of the streaming interest.

5. EXPLORATION AND EVALUATION ASSETS

The Corporation holds a 10% interest in the Labrador Nickel Royalty Limited Partnership ("LNRLP"), a limited partnership that holds a 3% net smelter return royalty in the Voisey's Bay nickel-copper-cobalt mine located in Northeastern Labrador, Canada. The Corporation holds an indirect 52.369% interest in the Genesee Royalty Limited Partnership, the Coal Royalty Limited Partnership, and the Potash Royalty Limited Partnership, collectively the "Prairie Royalties LPs". The Prairie Royalties LPs hold the rights to subsurface minerals in respect of a portfolio of coal and potash properties in the Canadian provinces of Alberta and Saskatchewan and have entered into leases, or similar agreements, with mining companies and electricity utilities that, in return for payment of a royalty, grant these companies the right to exploit the subsurface mineral resources.

7. MINING AND OTHER INVESTMENTS

Net book value	22,567	53,374	75,941

On May 3, 2016, the Corporation closed a copper purchase agreement (the "Agreement") related to the Chapada copper-gold mine located in central Brazil. The Corporation paid US$60,000,000 (CAD $75,820,000) and issued 400,000 common share purchase warrants to a subsidiary of Yamana Gold Inc. ("Yamana"). Under the terms of the Agreement, the Corporation is entitled to purchase 3.7% of the payable copper produced from the Chapada mine at 30% of the market price. The rate of payable copper is subject to reduction in the event of an expansion at Chapada or upon delivery of 75 million pounds of payable copper.

At July 31, 2016, $867,000 in acquisition costs have been capitalized to the asset, all of which were deferred as at April 30, 2016. The warrants were valued using the Black-Scholes option pricing model. The fair value calculated of $947,000 has been recorded as part of the streaming interest and the offsetting amount to equity.

(Tabular amounts in thousands of Canadian dollars, except per share amounts)

9. INCOME TAXES

On May 3, 2016, the Corporation obtained a senior secured debt facility of $150,000,000 (the "New Credit Facilities"), comprised of a $70,000,000, 4 year, amortizing term debt facility (the "Term Facility") and an $80,000,000, 3 year, revolving facility (the "Revolving Facility). The New Credit Facilities were provided by a

(Tabular amounts in thousands of Canadian dollars, except per share amounts)

10. DEBT (CONTINUED)

consortium of lenders led by the Bank of Nova Scotia, as Lead Arranger and Administrative Agent, ING Capital LLC as Syndication Agent and Bookrunner, and Export Development Canada and the Toronto-Dominion Bank, as Lenders. The Term Credit Facility is repayable over a four year period with quarterly principal repayments of $2,000,000, commencing July 31, 2016 until July 31, 2017 and increasing to $3,250,000 thereafter, bearing interest at variable rates based on the total debt ratio. The Revolving Facility is payable in full in 3 years and includes a cash sweep mechanism. Additional draw-downs on the Revolving Facility are permitted for future qualifying royalty and streaming acquisitions.

On May 3, 2016, the Corporation drew down the full amount of the Term Facility of $70,000,000 and $33,000,000 CAD ($26,000,000 USD) on the Revolving Facility to repay its previous credit facility of $66,000,000, led by Sprott Resource Lending Partnership, and to pay a portion of the purchase price related to the Chapada copper purchase agreement (Note 8).

The New Credit Facilities allow for optional prepayments, without penalty, of principal upon notice. The Corporation and its material subsidiaries act as obligors under the New Credit Facilities. The lenders have taken a secured charge against all real property of the credit parties and share pledges of all the equity interests in each of the credit parties.

The Corporation recorded costs of $2,008,000 that are directly attributable to securing the New Credit Facilities, against the balance of the debt, and is amortizing these costs over the Term Facility using an effective interest rate of 5.761% and over the Revolving Facility on a straight line basis. During the three months ended July 31, 2016, $166,000 of the costs were recognized in the statement of earnings.

Net costs of $1,875,000, associated with the previous credit facility, were recognized in the statement of earnings in the three months ended July 31, 2016 (2015 - $196,000) after the repayment of the debt.

In accordance with the terms of the New Credit Facilities, the Corporation has repaid $12,416,000 during the three months ended July 31, 2016, of which $2,000,000 represented a required quarterly principal repayment on the Term Facility. The balance of $10,416,000 was paid on the Revolving Facility.

As at July 31, 2016, the Corporation is in compliance with all debt covenants.

The following principal repayments for the New Credit Facilities are required over the next 5 years.

12. SHARE CAPITAL

On May 3, 2016, the Corporation closed an equity financing under a short-form prospectus. The equity offering (the "Offering") consisted of 3,578,800 common shares of the Corporation at a price of $11.25 per common share, for aggregate gross proceeds of $40,261,500. The common shares were offered for sale pursuant to an underwriting agreement dated April 19, 2016 among the Corporation and a syndicate of various underwriters. On closing, the Corporation paid the underwriters a fee equal to 5.0% of the gross proceeds of the Offering.

The Corporation used the net proceeds of the Offering for general corporate purposes and to partially fund the Agreement with Yamana in connection with the Chapada copper-gold mine in Brazil. The Corporation paid share issuance costs of $2,516,000, which were recorded against equity and reported net of deferred tax of $754,000. At April 30, 2016, $388,000 of these costs were deferred. The 400,000 warrants, issued to a subsidiary of Yamana, were assigned a fair value of $947,000 using the Black-Scholes option pricing model. The warrants expire on May 3, 2021 and have a strike price of $14.00

Net earnings (loss) per share

Basic and diluted net earnings (loss) per share were calculated using the weighted average number of common shares for the respective periods.

15. RELATED PARTY TRANSACTIONS

During the three months ended July 31, 2016, the Corporation billed Mining Equity (a joint venture investment) for the reimbursement of exploration and consulting assistance totaling $14,000 (2015 - $131,000) which is included in the accounts receivable balance as at July 31, 2016 and 2015 respectively.

Key management personnel include those persons having authority and responsibility for planning, directing and controlling the activities of the Corporation as a whole. The Corporation has determined that key management personnel consists of members of the Corporation’s Board of Directors and corporate officers, including the Corporation’s Executive Chairman, Chief Executive Officer and Chief Financial Officer, as well as two Vice Presidents reporting directly to a Corporate officer. Compensation paid to key management personnel and directors is as follows:

These transactions are in the normal course of operations and are measured at the fair value amount, which is the amount of consideration established and agreed to by the related parties.

16. FINANCIAL INSTRUMENTS AND RISK MANAGEMENT

Financial instruments recorded at fair value on the condensed consolidated balance sheets are classified using a fair value hierarchy that reflects the significance of the inputs used in making the measurements. The fair value hierarchy has the following levels:

Level 1 – valuation based on quoted prices (unadjusted) observed in active markets for identical assets or liabilities;

Level 2 – valuation techniques based on inputs that are quoted prices of similar instruments in active markets; inputs other than quoted prices used in a valuation model that are observable for that instrument; inputs that are derived principally from or corroborated by observable market data by correlation or other means; and estimates of expected volatility, expected life and expected risk-free rate of return, and;

Level 3 – valuation techniques with significant unobservable market inputs.

Fair values of the Corporation’s financial assets and financial liabilities were determined as follows:

(Tabular amounts in thousands of Canadian dollars, except per share amounts)

Risk Management

The Corporation’s financial assets and financial liabilities are exposed to various risk factors that may affect the fair value presentation or the amount ultimately received or paid on settlement of its assets and liabilities. The Corporation manages these risks through prudent investment and business decisions and, where the exposure is deemed too high, the Corporation may enter into derivative contracts to reduce this exposure. The Corporation does not utilize derivative financial instruments for trading or speculative purposes. Hedge accounting is applied only when appropriate documentation and effectiveness criteria are met.

A summary of the major financial instrument risks and the Corporation’s approach to the management of these risks are included in the April 30, 2016 annual consolidated financial statements.

17. SEGMENTED INFORMATION

Key measures used by the CODM in assessing performance and in making resource allocation decisions are earnings before interest, tax, depreciation and amortization and other income (expenses) (‘‘adjusted EBITDA’’) and earnings before income taxes. Both measures enable the determination of cash return on the equity deployed and overall profitability for each segment.

Revenue and expenses from the LNRLP and Prairie Royalties joint ventures (see Note 6) are included in the Royalties segment on a gross revenue and expense basis and adjusted to earnings in joint ventures (under the equity method) in the adjustment column of the table.

(Tabular amounts in thousands of Canadian dollars, except per share amounts)
