## **ALTIUS CONTINUES DRILLING**

Diamond drilling on Altius Minerals Corporation's Point Leamington property is near completion with company awaiting test results. The Point Leamington property is a 15 kilometre long volcanic belt that is a proven host to VMS mineralization. Upon cessation of the Point Leamington exploration program, Altius will commence a 4,000 metre drill program at its Lockport property where the company made a massive sulphide discovery in 1998. Inmet Mining Corporation may earn a 55 per cent interest in the Point Leamington and Lockport properties by funding \$2.5 million in expenditures over four years.
